

About Streamline Environmental Services

Streamline Environmental Services have been providing specialist services since 1997, starting from small scale pipework installations now encompassing in-house water treatment services including chemical de-scales to full M&E installation projects, which are all undertaken by our own fully qualified coded welders and skilled fitters.

We can provide commercial gas services to further enhance our scope of works to all sectors of industry, whereby we will be able to offer reactive, planned maintenance and one-off service visits.

We are fully accredited with Gas Safe (548713), CHAS, Construction line, Safe Contractor, ISO registered and a member of The Legionella Control Association to undertake all aspect of water quality control works and inspection.

Our client list includes Mitie FM, Cofely, PME, Interserve FM & Defence, Foreign and Commonwealth Office, Balfour Beatty to name a few.
